PRIVATE ISOLATION ROOMS

CURRENT **1** NEW **5** NET GAIN **4**

Individual private rooms will reduce the spread of germs, infections and disease

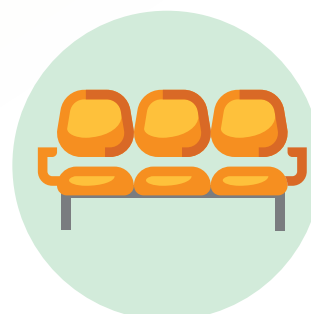

EMERGENCY MENTAL HEALTH AREA

The mental health area will have eight beds (up from seven), more privacy and will be designed to provide a calm atmosphere and access to a private courtyard.

TRAINING CENTRE

On-site training for staff, including simulation training, will ensure they're prepared for any situation.

WAITING SPACES

Various waiting areas keep patients closer to the team providing their care, and a patient & family lounge with children's area will help to keep kids occupied and engaged.
